innovations

Internet Promise Group[®]
... realizing the promise of a new world
through innovation

Products & Technologies - Overview

ADMO[®] is a fundamentally new, end-to-end smartphone platform & mobile advertising ecosystem that, for the first time, balances the interests of advertisers and consumers, a feat industry giants like Google, Facebook and Yahoo can't match.

CARD SECURE[®] is a secure mobile payment system superior to Apple Pay and similar mobile payment systems in every aspect.

CYBEREAL SHIELD[®] is a transparent national cyber security defense shield, unparalleled in its ability to safeguard the nation's critical infrastructure industries.

iCard[®] is a four-factor remote user authentication technology in a small key sized device, for authenticating remote user access to computer networks across a range of high & medium security applications.

RANDOM DANCE KEYS[®] is an end-to-end cellular & wireless data/communication security technology, with a new generation of data encryption keys for any type of wireless communication.

LIVE COUPON[®] is the first mobile coupon end-to-end ecosystem that bridges an entire chain of participants, from advertisers, to consumers, to merchants; including automatic fund disbursement for merchants, and data analytics for advertisers to refine their ad campaigns.

iGO[®] is a new social cause mobile engine & platform without peer, developed to mirror society's social dynamic structure in a unique, informative and interactive social platform.

JaPhoneTM is the next generation smartphone featuring twenty-five new innovations; including exciting new touch interfaces, network agility, GPS Smart technology, and an elegant minimalistic design profile.

Freedom[®] & **ihenar**[®] are new cutting-edge active-fashion wearable devices that capture consumer's imaginations with the ability to seamlessly communicate with, and effortlessly command their mobile world.
